

New Lightweight PTI Clamp

Extreme lightweight design

giving maximum performance and enhanced ease of use.

More compact, the new clamp equipped with a C1 arm weighs just 10.6 kg against 13.1 kg for the previous generation.

Improved ergonomics, the clamp has been shortened by 4.5 cm and the handle has been moved forward enhancing manoeuvrability.

High performance, welding current maintained at 14500A and clamping force of 550daN from 8 bar air pressure.

100% retro compatible, accessories such as arms and consumables (caps, electrodes...) remain unchanged.

Reduced risk of Repetitive Strain Injuries (RSI) due to evenly distributed weight and balance.
